Application/Control Number: 10/698,005 Page 2

Art Unit: 2632

1. The disclosure is objected to because of the following informalities: page 7, line 22, it appears that "reflective" should be --conductive-- (see p. 7, lines 12-13).

Appropriate correction is required.

2. Claims 4, 7-8 and 11-20 are objected to under 37 CFR 1.75(a) for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 4, 7-8, 11-12, 15-16 and 19-20, "the <u>reflective</u> surface" lacks antecedent basis (note, in the respective independent claims 1, 5, 9, 13 and 17, the object having a "<u>conductive</u> surface (or material)").

Claims 13 and 17, lines 7-8 in each claim, "the receiver circuit" lacks clear antecedent basis.

Claims 13 and 17, line 8 in each claim, it appears that "electrical" should be --electrically--.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 5-6 and 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Brady et al (US 6329915).

Brady et al discloses a communication system having first and second "communication devices", note RF base station 100 and RF tag 116 in Fig. 1; the RF base station 100 for transmitting an interrogation signal to the tag and for receiving a modulated signal from the tag in response thereto (col. 6, lines 42-57); the RF tag 116 having an "electronic circuit" (110-113 and 115 in Fig. 1, 124 in Fig. 2) for receiving the interrogation signal and generating the modulated signal in response thereto; the RF tag 116 further having an "antenna circuit" (114 in Fig. 1, 118 in Fig. 2) coupled to the electronic circuit and attached to an "object" formed of conductive material (note

Art Unit: 2632

"conducting material to which the tag is attached"--col. 4, lines 55-56); and, although Brady et al further discloses a ground plane 134 associated with the tag, Brady et al also teaches that "the ground plane may be dispensed with if the tag is to be attached to an electrically conducting material such as a metal (object)" (col. 7, lines 50-52). Thus, Brady et al further teaches "us(ing) the conductive surface (of the object) as a component of the antenna circuit", as claimed.

As to claims 6 and 10, the antenna (114,118) is a "patch antenna" (col. 6, lines 40-41), and the "antenna circuit" further comprises a dielectric base 120 (col. 7, lines 19-20).

5. Claims 1-3 are allowed.

Claims 4 and 13-20 would be allowable if rewritten or amended to overcome the objection(s) under 37 CFR 1.75(a) set forth in this Office action.

Claims 7-8 and 11-12 would be allowable if rewritten to overcome the objection(s) under 37 CFR 1.75(a) set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The art cited by applicant is made of record. Smith et al (US 6278369) is equivalent to Smith et al (US 2001/430), cited by applicant. Guthrie et al (US 6049278) is cited to further show the state of the art.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas J. Mullen, Jr. whose telephone number is 571-272-2965. The examiner can normally be reached on Monday-Thursday from 6:30 AM to 4 PM. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Wu, can be reached on (571) 272-2964. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 571-272-2600.
